

**Manure Happens
Take Credit!**

Land Application Trainings

January 26 through February 7, 2017

Learn basic manure management techniques and tips to keep the environment safe and you in compliance with your NPDES permit.

Who Should Be There?

- Recently permitted operations that have not completed the initial Land Application Training should attend the all day program. Participants attending all day (approx. 6 hrs.) will receive NDEQ Land Application Training certification.
- Additional educational training is required every 5 years for permitted operations. If you are unsure of your certification status, contact Leslie Johnson (UNL, 402-584-3818) or Ken Lamb (NDEQ, 402-471-4233). Farm representative attendance for the first 2 hours will fulfill NDEQ Land Application recertification required every 5 years for permitted operations.
- Farm staff and advisors implementing farm's permit or nutrient plan are welcome and encouraged to attend. Consider making this workshop part of your staff's training.

What Does It Cost?

- All Day: \$60 per operation plus \$15 per additional operation participant(s).
- Recertification: \$30 per participant
- Fees will be due upon arrival at the location. Please do not send fees with your registration.

Where and When Can I Attend?
